ForgeDocs

Document Generation for Microsoft Word

COMPLIANT, CLIENT-READY DOCUMENTS, GENERATED IN SECONDS.

Traditional document platforms add cost, training and governance headaches, and raise the risk of inconsistent templates and manual filing.

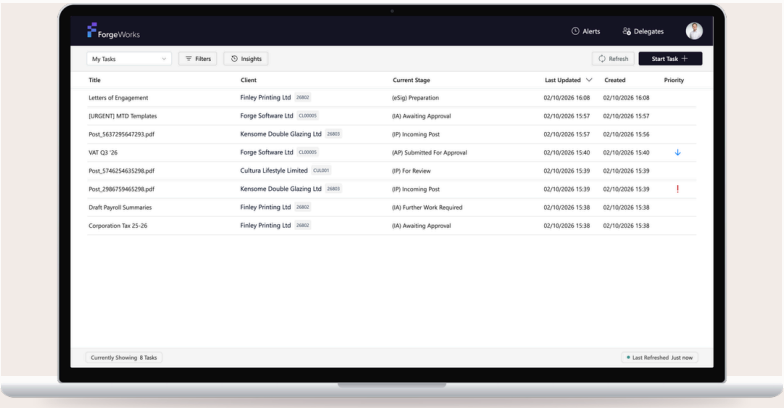

Forge Docs is a Microsoft Word add-in that lets your team generate compliant, client-ready documents without leaving Word. Templates are managed centrally in SharePoint, and finished documents are filed automatically according to your business rules.

Why Forge Docs?

- Faster document production
- Fewer naming and setup errors
- Better version control
- Minimal training and IT support

Key features

- Native Microsoft Word add-in
- Data merged from your CRM or PMS
- Templates managed in SharePoint
- Documents created automatically
- Filed to the right place, every time

Fewer errors, faster turnaround.
